INTRODUCTION

HOS provides any possible solution for your trade and business type. Depending on the size and field of your organization, we can create different products and services that will meet your requirements.

HOS began its business operation as a hardware and software solutions providing company in January 2015.

H.O.S Inc. began in a number of six students who specialized in studying ICT at Central Johannesburg College back in 2014 whereby things were not officially planned which ended having the company structure remaining with a number of three students in the beginning of the year in 2015. The three students continued with their passion in ICT and building the company of which their stated in their unity reunion "that a company is not a building but a person with a vision". The students planned their business model process in the market and in the business sector that they will specialize in software manufacturing.

Due that the company had less attention yearly after 2016 of which the three students partly separated from studying together due to the effect of change to the college premises. So it costed the company delays till it was refocused back fully during 2018 when one of the student got hired from an I.T Solutions company. The company has the rest of its structure completed due to some penetration running operations.

ISDF: YOUR AUTOMATION PARTNER

ISDF (INDIVIDUAL SOFTWARE DEVELOPERS FORUM) is a Software Development Departmental Team which is formed for the purpose of focusing and tackling huge projects globally. The forum is consisted of software developers from two companies, namely, Masikane IT Solutions (MITS) and Hypothetical Objective Systems (HOS). One focuses on the I.T solutions services and the other on software development services.

ISDF is focusing exclusively in high quality and cost-effective software development and implementation services. The teams to be included in ISDF should be recruited globally. The recruitment should be based on the capacity needs of the micro teams which might be working in big projects hosted by the two said companies or the targeted clients who are looking for exclusive skills.

To ensure success and survival of ISDF, one of the founder member Prof Mosa Moabi recruited 5 new Software Developers who are currently networking on the operations of the forum.

So the surviving founder of ISDF **Prof Mosa Moabi VXiii** is committed to ensuring that the vision of the forum of "being the leader in software development forums globally" is achieved.

We want to exhibit our talents as one of the best key players in Software development industry and improve our society by bringing change by advancing our surroundings.

OUR MISSION & VISION & OBJECTIVES

Our Mission is to grow in ICT field and advance our skills in the number of projects which we looking forward in getting ourselves involved whether individually or as a team. We also destined in managing a huge development team as time goes by.

Our Vision is to become the best solution builder's giving our customers the best service's needed to accommodate they needs. We will be happy to deliver great services by our fullest expertise capabilities in a short of time period as soon as possible. To see local businesses benefiting a lot of solutions to their businesses.

Our Objectives it is to see the Hypothetical Objective Systems Inc. company having branches globally worldwide, offering services and sharing core projects with other companies in the same field. Exposing the future generation to the latest technology.

OUR JOURNEY

2014

Starting journey as Software Development Firm (Unregistered)

The birth of the unregistered firm.

2015

The company leaked support and its operations were paused.

The members of the company couldn't proceed some of the operations of the company due to lack of funds.

2018

The company aroused in the late year of 2018. (Still Unregistered CIPC)

The company was reformed again by the last three remaining members with a load of new skills and innovations.

2019

The company is officially fully under operations and in process of company registration and finalization within its structure as in whole infrastructure of the company.

Successfully completed some of its wonderful company products which the company is also in process of licensing its products and registering its trademark.

 Mr. Siyanda Marvin
 Madiba

Co-Founder of H.O.S

**Co founder & Head of
Q&A and Chief
Technology Officer at
H.O.S**
 Dr. Kwame Boaduo

Co-Founder of H.O.S

The use of Internet protocols as well as subsets of World Wide Web formatting and coding standards for wireless applications has shorten the development cycle drastically and free up developers to concentrate on more important issues.

We are the team leaders within our own sections coordinating different stages within the Software Development Department.

We work in an Agile main stream and the department within it there's sections which work hand in hand with the other sub groups parented by the Individual Software Developers Forum and the department is married to the Hypothetical Objective Systems Inc.

Company which boost's the department of software development of the Individual Software Developers Forum. Hypothetical Objective Systems Inc. Company what it does a lot it administrates the Software Development department with more operations, maintains, it analyses for the department and co-ordinates most of the online machineries. So we the Software Development Department by the nickname of (Soft- touch) we are so passionate to serve you all the whole possible solutions which might reduce problems and by doing that it will grow our department here at the Individual Software Developers Forum.
