

# Try out M16 Interior POS – Software

## New Order 2019

We would like to welcome everybody to M16 Interior POS – Software for the internet café’s. whereby we the Masikane IT Solutions (PTY) LTD Company has being checking at other Internet cafes surrounding Soweto. Whether how do they operate within their Internet cafes when coming to the pricing of their products and services.

M16 Interior POS – Internet Café point of sale software is not like the other software specially designed for monitoring the systems of any internet cafes. M16 – is designed to perform sales operated at the Internet cafes. Of which it is an software meant to assist the cashier during the services of every day.

The internet cafes might have some different software’s more like Pastel, Express Accounts and True café but the difference between M16 and those above-mentioned software’s. M16 its that it can only perform sales at this current version of this software whereby as time goes M16 Interior will be developed to the next higher versions. As the end users of this software they will be helping us to integrate them according to their prospects views and possible feedbacks. It will be an advantage to witness any operations/ activities performed by the cashier.

M16 Interior manufactured by (MIT) Masikane IT Solutions (Software Department) and in the later stage after it’s SDLC Approach got completed it then happened that (HOS) Hypothetical Objective Systems Inc. (PTY) it assigned (ISDF) Individual Software Developers Forum to run some of the software maintenance on M16 Interior POS. The MIT Software development team is currently working on the planning of the next version of M16 Exterior POS version 2.

M16 POS existence began in 23 April 2018 due to the worries of some Internet café owners not feeling secured when leaving their staff behind with business. So there is proof requested from the business owners at the end of the day regardless of some styles of doing readings based on the sales and services offered.

“M16 Interior POS – Purpose of M16 Interior - POS”.

Masikane IT Solutions (MITS) offer a full range of IT support services, customized to your needs, at an affordable cost. This would cover issues from day to day trouble shooting to strategic long term planning. By employing our IT support services, clients will gain something just as valuable as money and indispensable to the running of their businesses. Instead of spending time sorting network glitches, standard issues and more complex IT concerns, prospective clients can spend their time being innovative, focusing on the attainment of strategic objectives that make their business thrive.

In accordance with the latter the prospective clients will have quality time to focus on their core business while we provide a full range of IT support services. Keys to success is marketing effectively, strategic partnership and hiring qualified/certified and knowledgeable staff to aid in the running of the business.
